

MMIM Fast Start Guide

Do not use MMIM to send Skype Spam! Be sure to abide by the Skype terms of service and your MMIM license to not spam or in any way abuse the power of this software. We do not endorse or encourage spam!

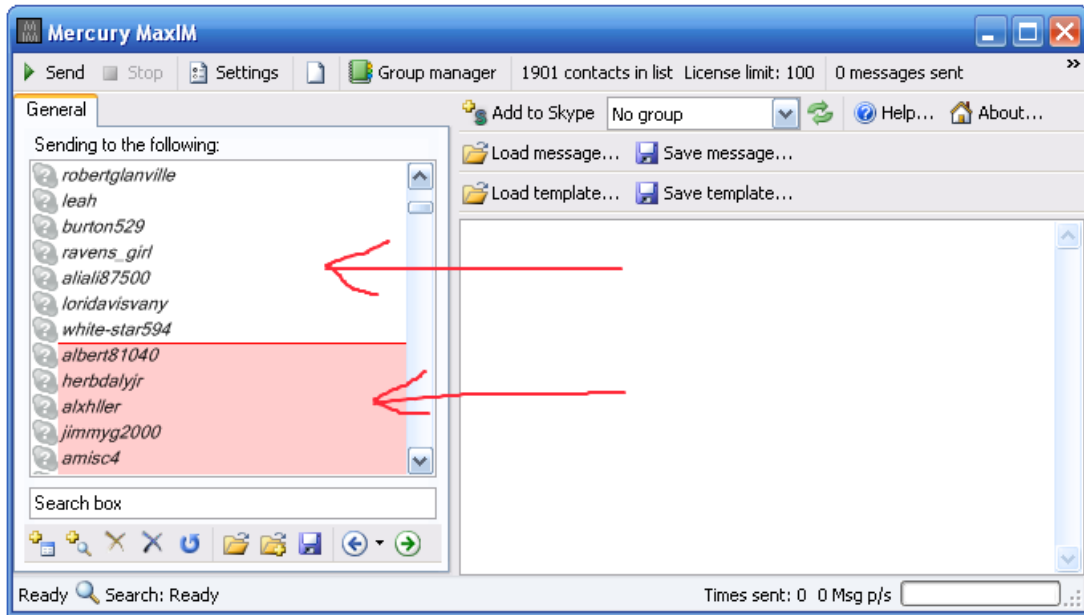

This is a powerful tool to help you build your relationships through efficient communication. You will be able to increase the size of your contact list and effectively communicate with them. Be sure to study our MMIM Skype™ Marketing guide.

MMIM Basic Functions

To see the function of any button place the mouse pointer over the button and read the description in the yellow pop up box.

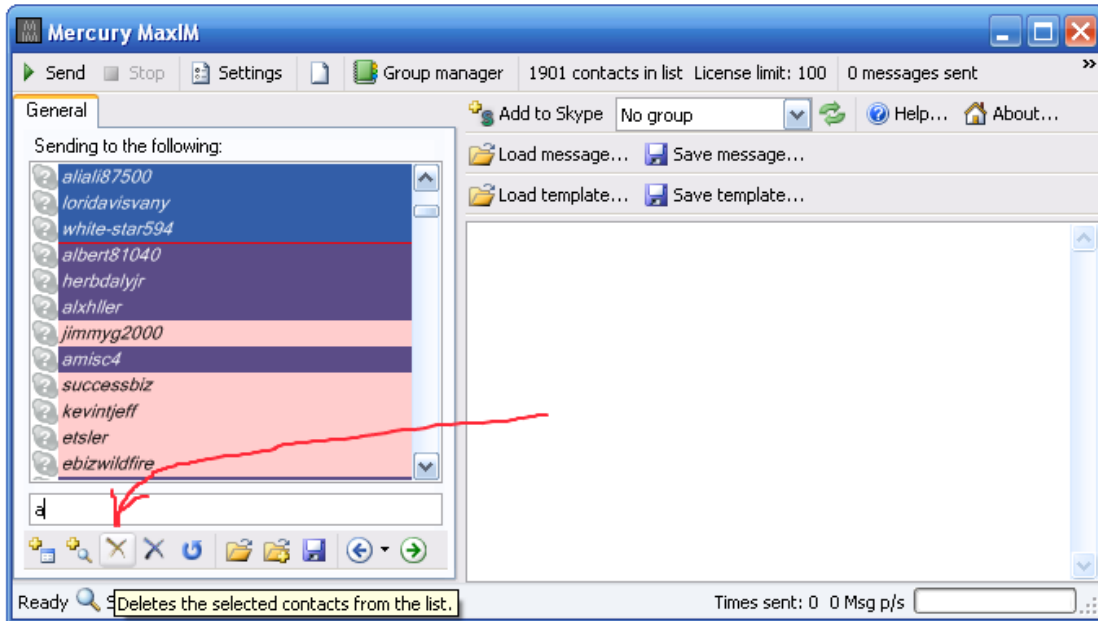

To load your Skype™ contact list click this button.

All the contacts in the list on the left side above are those who will get the message in the text box on the right. In the version shown above the maximum contacts on one list is 100 so the contacts over the limit are “in the red”. Those in red will not get the message. The first step is to make sure the list is the correct one that you want to send the message in the box to the right to.

MMIM has very powerful sorting and list management functions.

Use the “Search box” below the contact list to find contacts within the list. Type in an “a” to find all the contacts that contain an “a”. Those matching the search will be highlighted in blue.
